Dear Colleagues and Friends,

On behalf of the Organizing Committee, it is my great pleasure to invite you to participate in the upcoming Endoscopy Workshop to be held in Zagreb on November 27–28, 2025. This year's workshop will once again bring together leading experts and enthusiastic learners to share knowledge, demonstrate skills, and exchange experiences in the ever-evolving field of gastrointestinal endoscopy.

The programme is designed to offer a comprehensive educational experience, combining state-of-the-art lectures, clinical case-based discussions, and interactive tandem talks with a strong focus on advanced HPB endoscopy and lower GI interventions. A unique highlight of the pre-course day is at the Educational Center West, UHC Zagreb, where participants will have the opportunity to practice key techniques on ex-vivo models under the guidance of experienced mentors.

In addition, the Mentorship Corner will provide younger participants with the chance to engage in one-on-one discussions with senior faculty, fostering knowledge transfer and career development.

The main course, 22nd Zagreb Endo Live – Algorithms in GI Endoscopy, ERCP & EUS, will feature live demonstrations, cutting-edge lectures, and interactive debates, assuring that participants develop practical knowledge of modern diagnostic and treatment techniques.

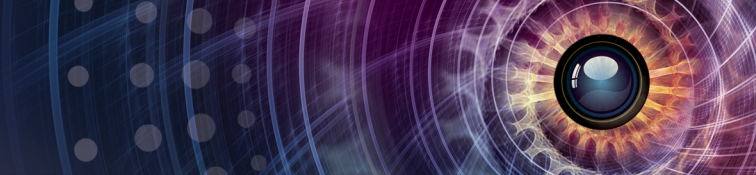

We are confident that this year's workshop will provide both an enriching scientific programme and an excellent opportunity to network with colleagues from across the region and beyond.

We warmly welcome you to Zagreb and eagerly look forward to your active involvement in making this event both memorable and successful.

With kind regards,

On behalf of the Organising Committee

Mirjana Kalauz and Pave Markos
